

Widespread Avalanching in Divide Drainage

Divide Cirque
Northern Gallatin
1/26/2019
Code
SS-NCr-R3-D2.5-O
Aspect
SE
Latitude
45.39030
Longitude
-110.96900
Notes

A skier in Hyalite reported widespread avalanche activity in the Divide drainage. From the email: "Saw this set of crowns just to the looker's left of Divide Peak proper. Appear to be [cornice](#) triggered, I suspect they all released sympathetically, maybe sometime yesterday. Impressively connected, definite PWL issue. SE [aspect](#). Crowns spanned nearly 1/2 mile of terrain." Photo: B. VandenBos

Multiple Avalanches
Number caught
0
Number buried
0
Number killed
0
Avalanche Type
Soft slab avalanche
Trigger
Cornice fall
Trigger Modifier
r-A remote avalanche released by the indicated trigger
