

West pine creek

Date

Sun, 02/14/2021 - 16:53

Activity

Snowboarding

Toured into west pine today for a short outing. Got a handful of large and small whomps. Dug a snow pit on a south east aspect at 6800' I got ectn however I had a log running through the side of my pit so I think that altered my results. I did take my shovel afterwards and did a pull test and the recent storm slab (30") came off pretty easy.

Region

Northern Gallatin

Observer Name

Elton
