Whumpfs and Shooting Cracks on Woody Ridge

Woody Ridge Cooke City 2/22/2022 Code Latitude 44.97390 Longitude -109.92400

Notes

I had two whumps and shooting cracks of small wind slabs (10cm thick) near the top of Woody Ridge on a W <u>aspect</u>. The top of Woody usually has a weak and thin snowpack and gets scoured or loaded, so I wasn't surprised.

No other signs of instability observed.
