Small skier triggered storm slab

COOKE CITY Cooke City 1/29/2023 Code SS-ASc-R1-D1-I Latitude 45.02020 Longitude -109.93800

Notes

Some photos of recent natural avalanche activity near Cooke City attached. We observed about $10 \underline{\text{slab}}$ avalanches today that ran during this cycle.

.... And I was able to intentionally trigger a small storm slab today (20' wide, 1' deep) by kicking a small cornice.
